Semi Synthetic 10W40

Semi synthetic passenger car engine oil

Product code: M119

Product Description:

A semi synthetic multigrade engine oil meeting ACEA and API specifications required by a large number of cars and light commercial vehicles.

Engine design has changed rapidly over recent years. Increased output from smaller units coupled with reduced engine oil sump capacity has put greater demands on the lubricant.

Semi Synthetic 10W40 is designed to meet these challenges and is manufactured from a balanced blend of top quality mineral and synthetic base stocks to produce a high quality engine oil with outstanding properties. Its naturally higher lubricity offers lower internal friction which reduces engine wear and improves fuel economy. It provides excellent stay in grade performance for a wide range of modern engines.

Benefits:

- ☑ Suitable for a wide range of vehicles
- ☑ Stay in grade properties
- ☑ Excellent high and low temperature stability
- ☑ Improved oil consumption and emissions
- ☑ Superior performance over standard mineral based oils

Applications:

Semi Synthetic 10W40 is suitable for normally aspirated and turbocharged highly stressed diesel and petrol engines in passenger cars and light commercial vehicles. It is miscible with all synthetic and mineral based engine oils.
